

architecture foundation of oregon

The Architecture Foundation of Oregon supports Oregon’s quality of life and creates awareness of our designed environment through education, engagement and inspiration.

# Educate

## Cultivating creativity in our communities

AFO believes that all Oregonians benefit from thoughtful design in their homes, in their community and in the environment around them. Through dynamic programming such as our Architects in Schools and Portland Hip Hop Architecture Camp, AFO works with community partners to share design’s role in shaping our future.

# Engage

## Convening dynamic conversations across Oregon

AFO partners with organizations across the state to connect communities with the power of design. By convening conversations and encouraging involvement, we empower people to embrace design as a tool to impact Oregon for generations to come.

# Inspire

## Sparking ideas that broaden our world

AFO embraces the special sense of place that makes Oregon a unique location. From honoring the people and organizations that define this place we call home to fostering the next generation of leaders and thinkers, we work to ensure that our built and natural environments inspire us to dream more, create more and do more.

## Summarized Income 2020

### Your membership helps us:

- Launch a new College Student Mentorship program
- Revise our Architects in Schools curriculum to include lessons about the diverse cultural influences in our built environment, how the history of racism has affected that environment, and the possibilities for a more just future through the A/E/C industry
- Expand access to our Architects in Schools program in rural and underserved schools across Oregon
- Invest more in the shared priorities of our existing partners
- Recognize and support our state's most innovative leaders in design and the community-centered projects they are championing
- Build partnerships to support projects and initiatives which build stronger, equitable communities across the state
- Work with our partners to develop a statewide pipeline for inspiring, supporting and training a more diverse community of design, architecture, engineering and construction professionals in Oregon
